Lightspeed Parent Portal™

Empower parents with visibility and control

Whether parents and guardians are serving as tech support or monitoring their child's focus and device usage, their involvement is more important than ever. Lightspeed Parent Portal gives parents greater visibility and control of their children's internet usage on school-issued devices outside of school hours.

The Lightspeed Parent Portal allows IT administrators to granularly choose which settings parents can view and manage, including:

- Allow, restrict, or block after-school access to YouTube and social media, including Facebook, Instagram, Twitter, and more.
- Receive the Weekly Student Online Activity Report email showing the number of browsed web pages, student time spent daily online, and sites most commonly visited.
- See real-time web activity with time-stamped data and allowed/blocked indicators for each website visited.
- Pause web browsing for one hour, three hours, or overnight to manage screen time.
